MEGAZINC®

MegaZinc is a registered trademarked process providing an electroplated Zinc (Galvanised) coating of between 10 and 30 microns thick (depending on the class), plus various organic protective finishes, which, inter alia, will leach and seal the plated article and according to our suppliers documentation, should enabling it to withstand a neutral Salt Spray test (SABS 7253 accredited method) of:

1. 800 – 900 Hours (Class A)
2. 700 – 800 Hours (Class B)
3. 600 – 700 Hours (Class C)

before the appearance of Red Rust. (Tested and Verified as per SABS test report no: 7222/2542276/Y088.
